1. Introduction

The Quarterly Labour Force Survey (QLFS) is a household-based sample survey conducted by Statistics South Africa (Stats SA). It collects data on the labour market activities of individuals aged 15 years and older who live in South Africa. However, this report only covers labour market activities of persons aged 15–64 years.

This report presents key findings of the QLFS conducted from January to March 2024 (Q1: 2024).

2. Highlights of the results

Table A: Key labour market indicators

	Jan-Mar 2023	Oct-Dec 2023	Jan-Mar 2024	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change
	Thousand					Per cent	
	40 604	41 022	41 158	137	555	0,3	1,4
Population 15–64 years

Employed	16 192	16 723	16 745	22	552	0,1	3,4
Formal sector (non-agricultural)	11 186	11 488	11 544	56	358	0,5	3,2
Informal sector (non-agricultural)	3 062	3 181	3 082	-100	19	-3,1	0,6
Agriculture	888	920	941	21	54	2,3	6,1
Private households	1 056	1 134	1 178	44	122	3,9	11,5
Unemployed	7 933	7 895	8 226	330	293	4,2	3,7
Not economically active	16 479	16 403	16 188	-215	-291	-1,3	-1,8
Discouraged work-seekers	3 276	3 049	3 048	-1	-229	0,0	-7,0
Other (not economically active)	13 202	13 354	13 140	-214	-62	-1,6	-0,5
Rates (%)							
Unemployment rate	32,9	32,1	32,9	0,8	0,0		
Employed/population ratio (absorption)	39,9	40,8	40,7	-0,1	0,8		
Labour force participation rate	59,4	60,0	60,7	0,7	1,3		

Due to rounding, numbers do not necessarily add up to totals.

Working-age population increased by 137 000 or 0,3% in the first quarter of 2024 compared to the fourth quarter of 2023. The number of employed persons increased by 22 000 to 16,7 million in Q1: 2024, and the number of unemployed persons increased by 330 000 to 8,2 million compared to Q4: 2023, resulting in an increase of 352 000 (up by 1,4%) in the labour force. The number of discouraged work-seekers decreased by 1 000, and the number of people who were not economically active for reasons other than discouragement decreased by 214 000 (down by 1,6%) between the two quarters, resulting in a net decrease of 215 000 in the not economically active population.

An increase in employment and unemployment resulted in an increase of 0,8 of a percentage point in the unemployment rate to 32,9% in the first quarter of 2024. The labour force participation rate increased by 0,7 of a percentage point to 60,7%, while the absorption rate decreased by 0,1 of a percentage point to 40,7%, between Q4: 2023 and Q1: 2024.

Employment gains were observed in the formal sector (up by 56 000), Private households (up by 44 000) and the Agricultural sector (up by 21 000), while informal sector employment decreased by 100 000 in Q1: 2024.

Compared to Q1: 2023, the working-age population increased by 555 000 or 1,4%. Total employment increased by 552 000 persons (or 3,4%) and the number of unemployed persons increased by 293 000 (or 3,7%), while the number of persons who were not economically active decreased by 291 000 (or 1,8%).

3. Employment

Figure 1: Quarter-to-quarter changes in employment, Q1: 2019 to Q1: 2024

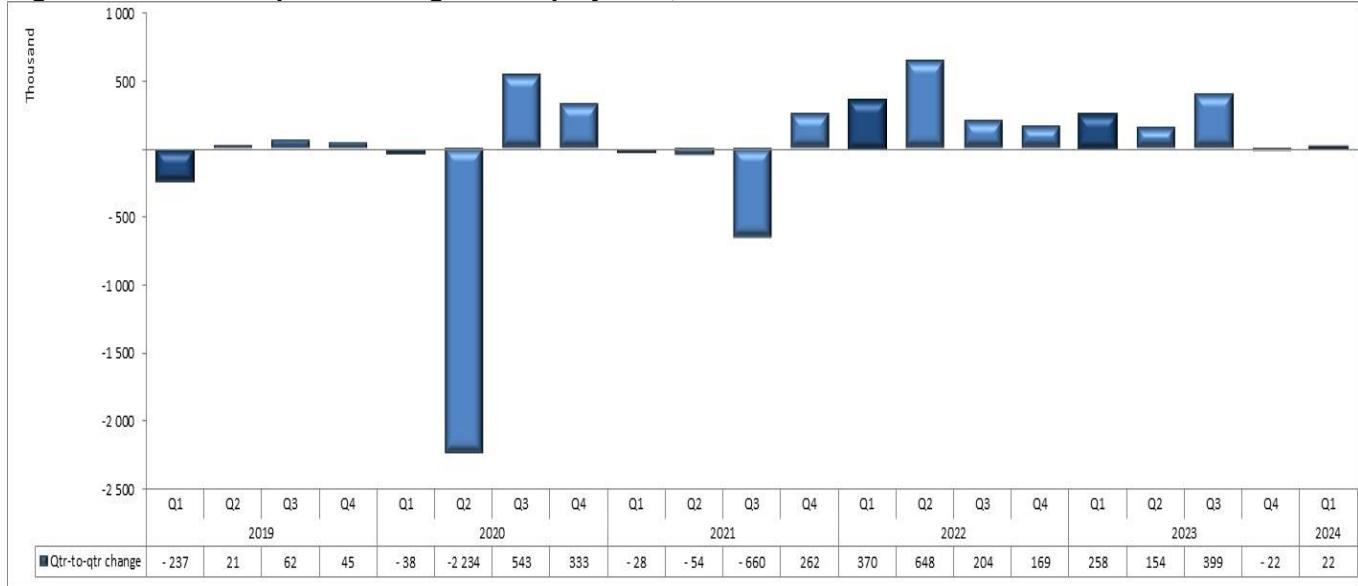

Figure 1 shows that, following a decrease of 22 000 in the previous quarter, employment increased by 22 000 in the first quarter of 2024. As depicted in Figure 1, employment has been increasing in the first quarter of each year, for the past three years.

Table B: Employment by industry

Industry	Jan-Mar 2023		Oct-Dec 2023		Jan-Mar 2024		Qtr-to-qtr change	Year-on-year change	Qtr-to-qtr change	Year-on-year change
	Thousands				Per cent					
	Total*	16 192	16 723	16 745	22	552	0,1	3,4		
Agriculture		888	920	941	21	54	2,3	6,1		
Mining		413	446	454	9	42	1,9	10,1		
Manufacturing		1 654	1 507	1 606	99	-48	6,6	-2,9		
Utilities		135	123	105	-17	-30	-14,1	-21,9		
Construction		1 201	1 322	1 215	-106	15	-8,0	1,2		
Trade		3 269	3 362	3 471	109	202	3,2	6,2		
Transport		992	1 023	1 062	39	69	3,8	7,0		
Finance		2 667	2 964	2 914	-50	247	-1,7	9,2		
Community and social services		3 902	3 913	3 791	-122	-111	-3,1	-2,8		
Private households		1 056	1 134	1 178	44	122	3,9	11,5		

*Note: Total includes 'Other' industries.

Due to rounding, numbers do not necessarily add up to totals.

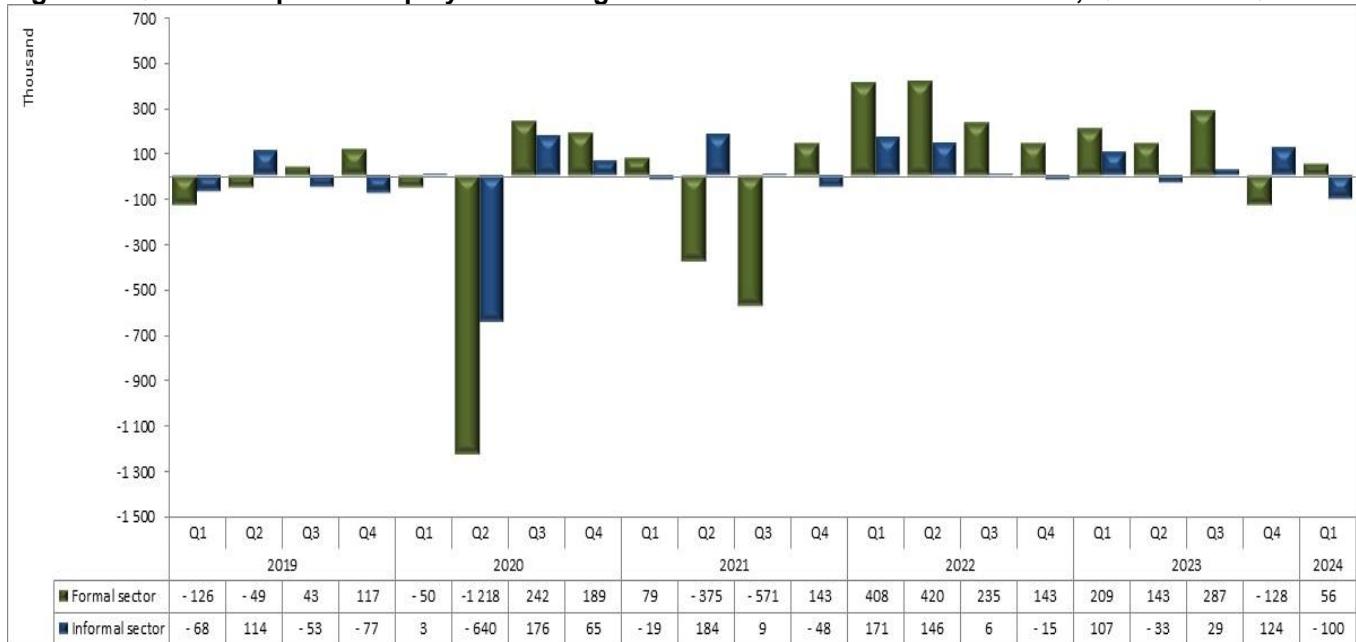

Note: Utilities refers to electricity, gas and water supply.

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

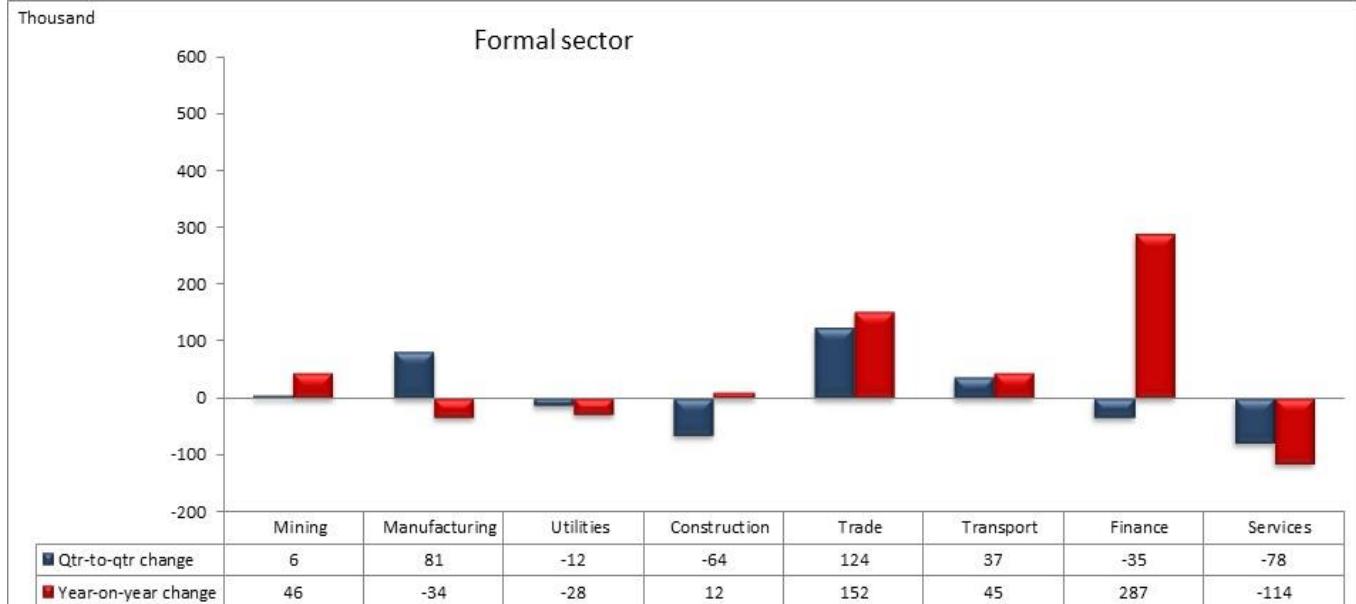

Finance refers to financial intermediation, insurance, real estate and business services.

Table B shows that between Q4: 2023 and Q1: 2024, the number of employed persons increased in six of the ten industries. The largest increases in employment were recorded in Trade (109 000), followed by Manufacturing (99 000), Private households (44 000) and Transport (39 000). Decreases in employment were recorded in Community and social services (122 000), Construction (106 000), Finance (50 000) and Utilities (17 000) industries.

Compared to the same period last year, a net increase of 552 000 in total employment in Q1: 2024 was largely due to increases in the number of people employed in Finance (247 000), Trade (202 000) and Private households (122 000) industries. The industries that recorded decreases were Community and social services (111 000), Manufacturing (48 000) and Utilities (30 000).

Figure 2: Quarter-to-quarter employment changes in the formal and informal sectors, Q1: 2019 to Q1: 2024

Following an increase of 124 000 in Q4: 2023, informal sector employment decreased by 100 000 in Q1: 2024. Employment in the formal sector increased by 56 000 in Q1: 2024 compared to Q4: 2023.

Figure 3: Quarter-to-quarter and year-on-year changes in the formal sector by industry

Note: Utilities refers to electricity, gas and water supply.

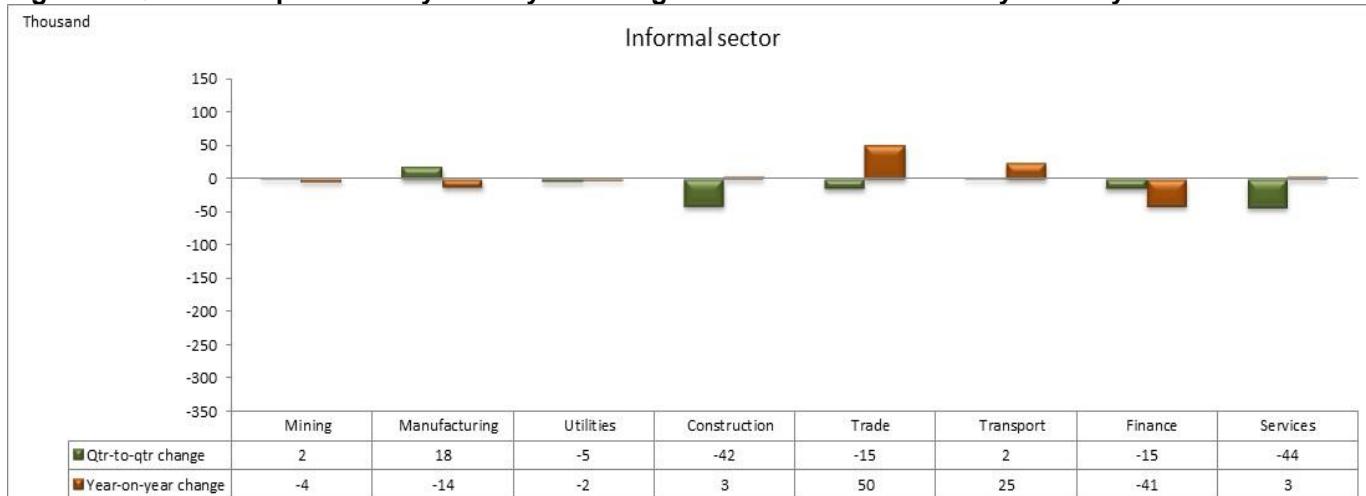

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

Finance refers to financial intermediation, insurance, real estate and business services.

Services refers to community, personal and social services.

The first quarter of 2024 recorded formal sector employment increases in Trade (124 000), Manufacturing (81 000), Transport (37 000) and Mining (6 000) industries compared to the fourth quarter of 2023. During the same period, decreases in the formal sector employment were recorded in Community and social services (78 000), Construction (64 000), Finance (35 000) and Utilities (12 000).

Compared to a year ago, a net gain of 358 000 jobs in the formal sector employment was mainly driven by Finance (287 000) and Trade (152 000) industries in Q1: 2024. Employment losses were observed in Community and social services (114 000), Manufacturing (34 000) and Utilities (28 000) industries during the same period.

Figure 4: Quarter-to-quarter and year-on-year changes in the informal sector by industry

Note: Utilities refers to electricity, gas and water supply.

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

Finance refers to financial intermediation, insurance, real estate and business services.

Services refers to community, personal and social services.

In the first quarter of 2024, informal sector employment decreased by 100 000 persons compared to the previous quarter. Losses in the informal sector employment were mainly driven by Community and social services (44 000) and Construction (42 000) industries. Compared to Q1: 2023, the employment increase in the informal sector was mainly driven by Trade (50 000) and Transport (25 000) industries. Losses in employment were recorded in Finance (41 000), Manufacturing (14 000), Mining (4 000) and Utilities (2 000) industries.

Table C: Employment by occupation

Occupation	Jan-Mar 2023	Oct-Dec 2023	Jan-Mar 2024	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change
	Thousand						
Total*	16 192	16 723	16 745	22	552	0,1	3,4
Manager	1 356	1 481	1 303	-178	-53	-12,0	-3,9
Professional	1 218	1 341	1 229	-112	11	-8,3	0,9
Technician	1 476	1 441	1 590	149	114	10,3	7,7
Clerk	1 747	1 727	1 808	81	61	4,7	3,5
Sales and services	2 706	2 862	2 746	-117	40	-4,1	1,5
Skilled agriculture	68	63	94	31	26	48,7	37,8
Craft and related trade	1 724	1 693	1 693	0	-31	0,0	-1,8
Plant and machine operator	1 274	1 323	1 568	245	294	18,5	23,0
Elementary	3 824	3 912	3 845	-66	21	-1,7	0,6
Domestic worker	797	876	869	-7	72	-0,8	9,1

*Note: Total includes 'Other' occupations.

Due to rounding, numbers do not necessarily add up to totals.

Four out of the ten occupational categories recorded employment gains in Q1: 2024 compared to Q4: 2023. Large increases in employment were observed in Plant and machine operator occupations (245 000), followed by Technician (149 000) and Clerical (81 000) occupations. During the same period, employment decreases were recorded in Managerial occupations (178 000), followed by Sales and services (117 000), Professional (112 000), Elementary (66 000) and Domestic worker (7 000) occupations, while Craft and related trade remained unchanged.

Year-on-year gains in employment were mainly driven by Plant and machine operator occupations (294 000), followed by Technician (114 000) occupations. The only losses in employment were recorded among Managerial (53 000) and Craft and related trade (31 000) occupations.

Table D: Employment by province

Province	Jan-Mar 2023	Oct-Dec 2023	Jan-Mar 2024	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change
	Thousand					Per cent	
South Africa	16 192	16 723	16 745	22	552	0,1	3,4
Western Cape	2 658	2 757	2 740	-17	82	-0,6	3,1
Eastern Cape	1 421	1 348	1 344	-4	-77	-0,3	-5,4
Northern Cape	339	327	331	4	-8	1,3	-2,4
Free State	790	742	742	0	-48	0,0	-6,0
KwaZulu-Natal	2 594	2 856	2 891	35	297	1,2	11,4
North West	877	912	899	-13	22	-1,4	2,5
Gauteng	4 984	5 034	5 061	26	76	0,5	1,5
Mpumalanga	1 141	1 250	1 242	-8	101	-0,7	8,8
Limpopo	1 388	1 498	1 495	-3	107	-0,2	7,7

Due to rounding, numbers do not necessarily add up to totals.

Table D shows that the number of employed persons increased in three provinces between Q4: 2023 and Q1: 2024. Employment gains were recorded in KwaZulu-Natal (35 000), Gauteng (26 000) and Northern Cape (4 000). Employment decreases were recorded in Western Cape (17 000), followed by North West (13 000), Mpumalanga (8 000), Eastern Cape (4 000) and Limpopo (3 000) during the same period, while Free State remained unchanged.

Compared to Q1: 2023, the largest increases in employment were recorded in KwaZulu-Natal (297 000), Limpopo (107 000) and Mpumalanga (101 000). Eastern Cape, Free State and Northern Cape were the only provinces that recorded losses in employment with a decrease of 77 000, 48 000 and 8 000 respectively, during the same period. KwaZulu-Natal had the largest year-on-year percentage change increase in employment of 11,4%.

3.1 Conditions of employment for employees

Figure 5: Quarter-to-quarter changes in nature of employment contract

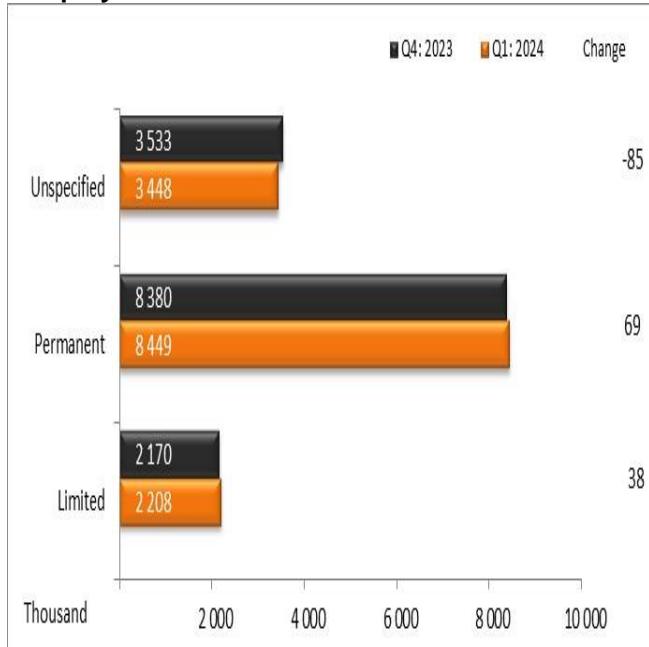

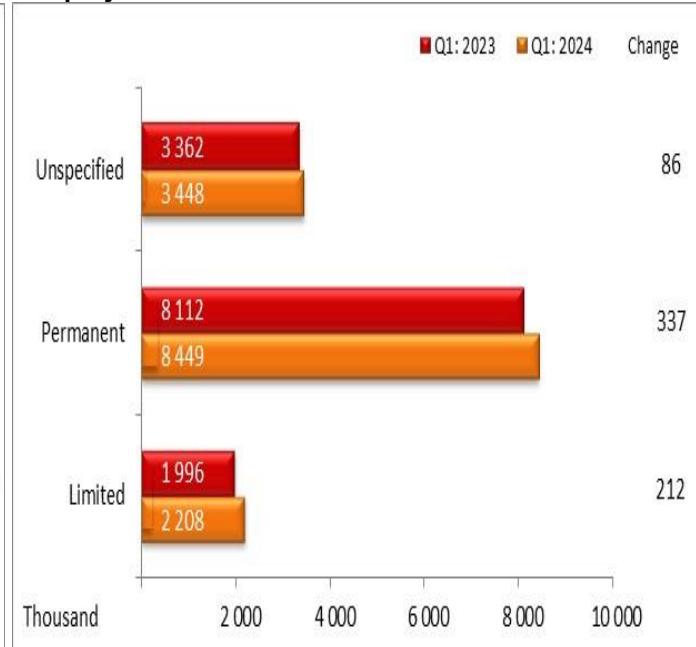

Figure 6: Year-on-year changes in nature of employment contract

Figures 5 and 6 show that the majority of employees had permanent employment contracts. Between the fourth quarter of 2023 and the first quarter of 2024, the number of employees decreased among those with contracts of unspecified duration (85 000), while the number of employees increased among those with contracts of permanent nature (69 000) and limited duration (38 000).

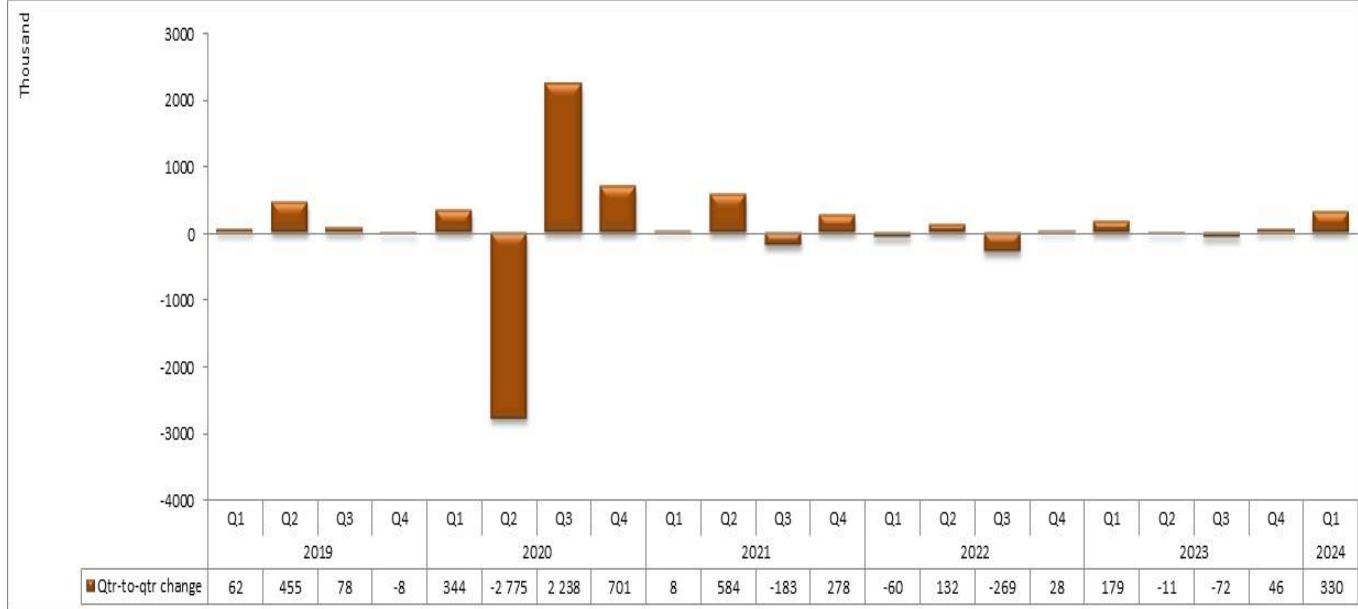

Year-on-year comparisons indicated that the number of employees increased for all contract types. The biggest increase was among those with contracts of a permanent nature (337 000), followed by those with contracts of limited duration (212 000) and unspecified duration (86 000).

4. Unemployment and not in employment, education or training (NEET)

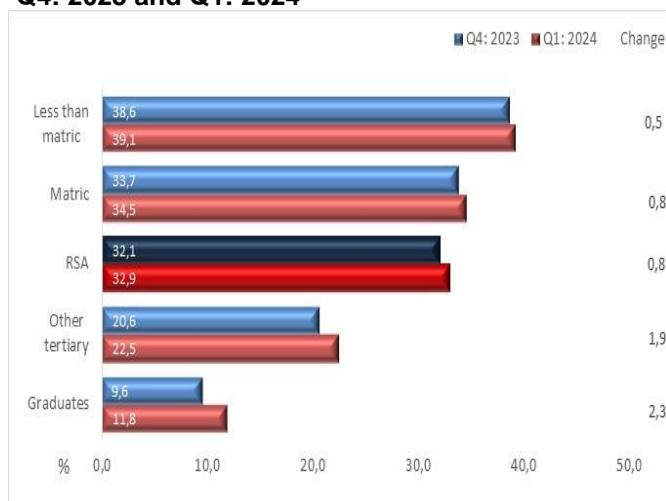

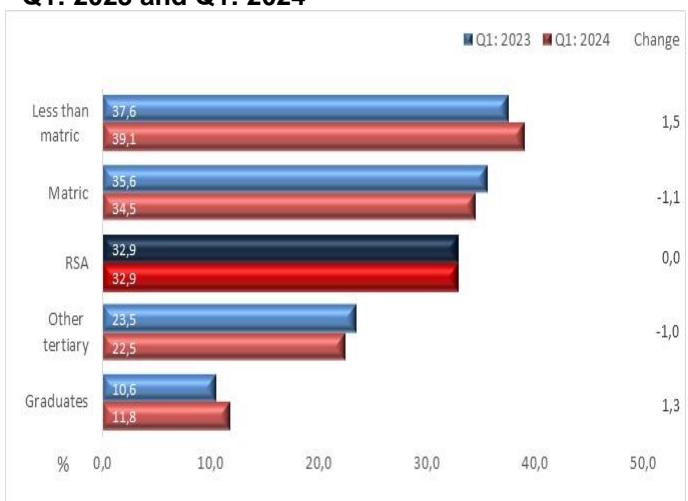

4.1 Unemployment

There are two definitions of unemployment used: the official and the expanded definition of unemployment (refer to technical notes).

Figure 7: Quarter-to-quarter changes in unemployment, Q1: 2019 to Q1: 2024

Unemployed persons increased by 330 000 in Q1: 2024 following an increase of 46 000 in the previous quarter. Notable from Figure 7 is that this is the largest increase in unemployment in the first quarter since the COVID-19 national lockdown in Q2: 2020. However, it should be noted that unemployment has always increased in the first quarter of each year since the inception of the survey, except for the decline in 2022.

Figure 8a: Unemployment rate by education level, Q4: 2023 and Q1: 2024**Figure 8b: Unemployment rate by education level, Q1: 2023 and Q1: 2024**

Figures 8a and 8b illustrate the significant impact of education on mitigating a nation's unemployment rate. Possessing a tertiary education, especially a degree, enhances one's likelihood of securing employment. In Q1: 2024, individuals with an educational attainment less than matric recorded an unemployment rate of 39,1% (up by 0,5 of a percentage point), while graduates had a rate of 11,8% (up by 2,3 percentage points) compared to the previous quarter. Unemployment rates for those with matric or lower educational qualifications exceeded the national rate, whereas individuals with other tertiary qualifications and graduates had rates below the national unemployment rate. Year-on-year comparisons indicated that the unemployment rate increased among graduates and those with education levels below matric while the rate decreased for other tertiary and matric.

Table E: Unemployment rate by province

	Official unemployment rate					Expanded unemployment rate				
	Jan-Mar 2023	Oct-Dec 2023	Jan-Mar 2024	Qtr-to-qtr change	Year-on-year change	Jan-Mar 2023	Oct-Dec 2023	Jan-Mar 2024	Qtr-to-qtr change	Year-on-year change
	Per cent			Percentage points		Per cent			Percentage points	
	South Africa	32,9	32,1	32,9	0,8	0,0	42,4	41,1	41,9	0,8
Western Cape	21,6	20,3	21,4	1,1	-0,2	25,9	25,6	26,1	0,5	0,2
Eastern Cape	40,0	41,9	42,4	0,5	2,4	45,3	47,1	49,1	2,0	3,8
Northern Cape	26,6	26,9	28,3	1,4	1,7	42,6	42,9	41,7	-1,2	-0,9
Free State	34,4	37,0	38,0	1,0	3,6	39,7	43,9	45,1	1,2	5,4
KwaZulu-Natal	30,9	29,5	29,9	0,4	-1,0	47,3	43,4	43,7	0,3	-3,6
North West	38,0	39,0	40,5	1,5	2,5	54,0	52,2	53,6	1,4	-0,4
Gauteng	34,3	33,8	34,2	0,4	-0,1	39,6	38,4	38,9	0,5	-0,7
Mpumalanga	38,5	34,9	36,2	1,3	-2,3	49,7	45,8	47,0	1,2	-2,7
Limpopo	33,6	30,3	32,7	2,4	-0,9	48,6	46,7	47,8	1,1	-0,8

The official unemployment rate increased by 0,8 of a percentage point to 32,9% in Q1: 2024 compared to Q4: 2023. The official unemployment rate increased in all provinces. The largest increases were recorded in Limpopo (2,4 percentage points), followed by North West (1,5 percentage points), Northern Cape (1,4 percentage points), Mpumalanga (1,3 percentage points) and Western Cape (1,1 percentage points).

Year-on-year, the official unemployment rate remained unchanged. The official unemployment rate decreased in five provinces. The largest decrease in the unemployment rate was recorded in Mpumalanga (2,3 percentage points), followed by KwaZulu-Natal (1,0 percentage point). The largest increases in the unemployment rate were recorded in

Free State (3,6 percentage points), followed by North West (2,5 percentage points) and Eastern Cape (2,4 percentage points).

The expanded unemployment rate increased by 0,8 of a percentage point in Q1: 2024 compared to Q4: 2023. All provinces recorded an increase in the expanded unemployment rate, except for Northern Cape, where the rate decreased by 1,2 percentage points. The largest increase was recorded in Eastern Cape (2,0 percentage points), followed by North West (1,4 percentage points), Mpumalanga and Free State (1,2 percentage points each) and Limpopo (1,1 percentage points).

Compared to the same period last year, the expanded unemployment rate decreased by 0,5 percentage points in Q1: 2024. Six out of the nine provinces recorded decreases in the expanded unemployment rate. The largest decrease in the expanded unemployment rate was recorded in KwaZulu-Natal (3,6 percentage points), followed by Mpumalanga (2,7 percentage points). The only increases in the expanded unemployment rate were recorded in Free State (5,4 percentage points), Eastern Cape (3,8 percentage points) and Western Cape (0,2 of a percentage point).

4.2 Not in employment, education or training (NEET)

Some young people have been disengaged from the labour market and they are also not building on their skills base through education and training – they are not in employment, education or training (NEET). The NEET rate serves as an important additional labour market indicator for young people.

Figure 9a: NEET rate for youth aged 15–24 years by sex

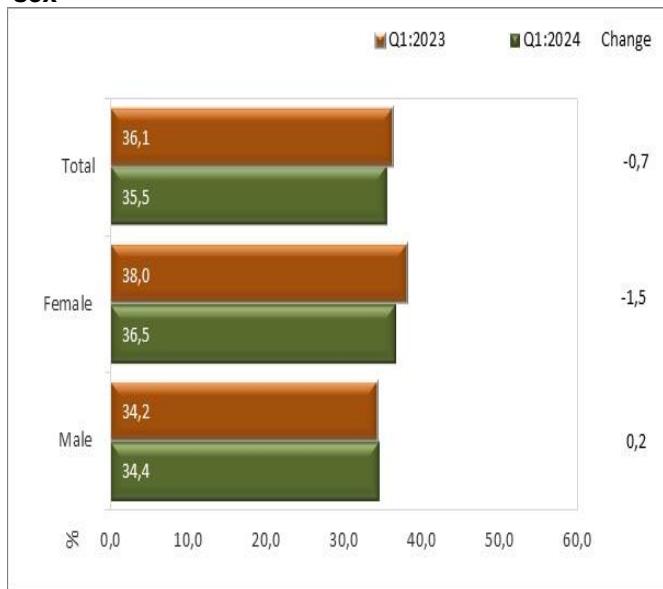

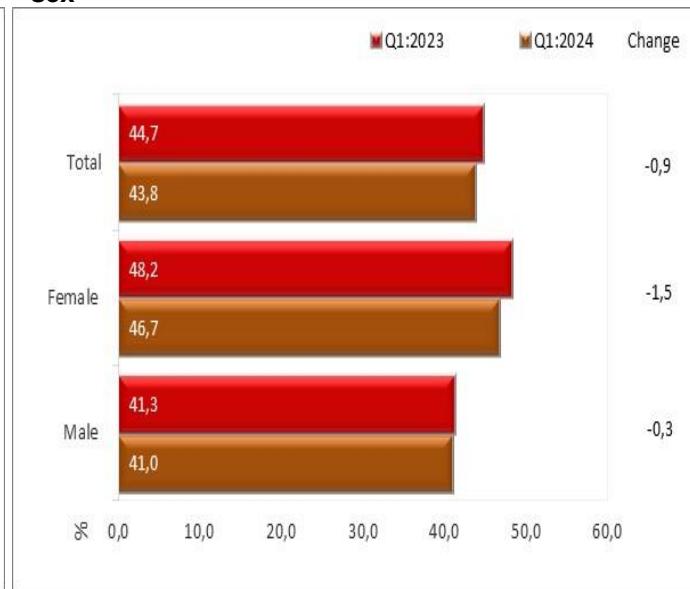

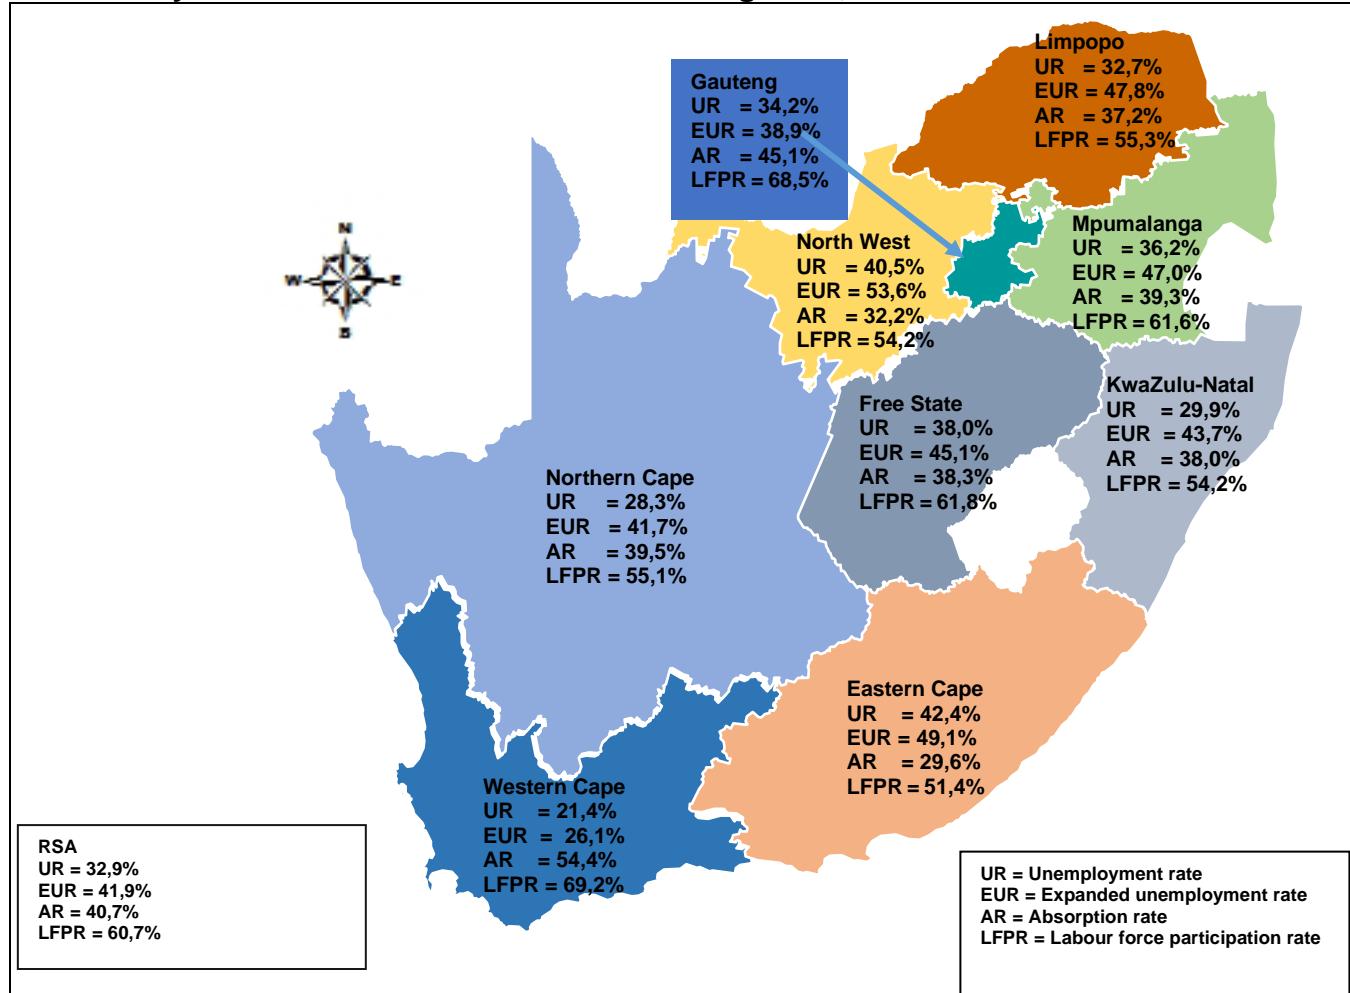

Figure 9b: NEET rate for youth aged 15–34 years by sex

There were about 10,3 million young people aged 15–24 years in Q1: 2024, of which 35,5% were not in employment, education or training. This is 0,7 of a percentage point lower than the NEET rate in Q1: 2023. In this age group, the NEET rate for females decreased by 1,5 percentage points while for males it increased by 0,2 of a percentage point. The NEET rate for females was higher than that of their male counterparts in both years (Figure 9a).

Compared to Q1: 2023, the percentage of young persons aged 15–34 years who were NEET decreased by 0,9 of a percentage point from 44,7% to 43,8% in Q1: 2024. The NEET rate for females decreased by 1,5 percentage points, and for males the rate decreased by 0,3 of a percentage point. In both Q1: 2023 and Q1: 2024, more than four in every ten young people were not in employment, education or training (Figure 9b).

Figure 14: Unemployment rate by education status, Q1: 2016 to Q1: 2024

7. The Quarterly Labour Force Survey (QLFS) and the Quarterly Employment Survey (QES)

Stats SA conducts two official sources of employment statistics surveys: QES (which is establishment based) and QLFS (which is household based). Each survey has its strengths and limitations. For example, QES cannot provide information on the following:

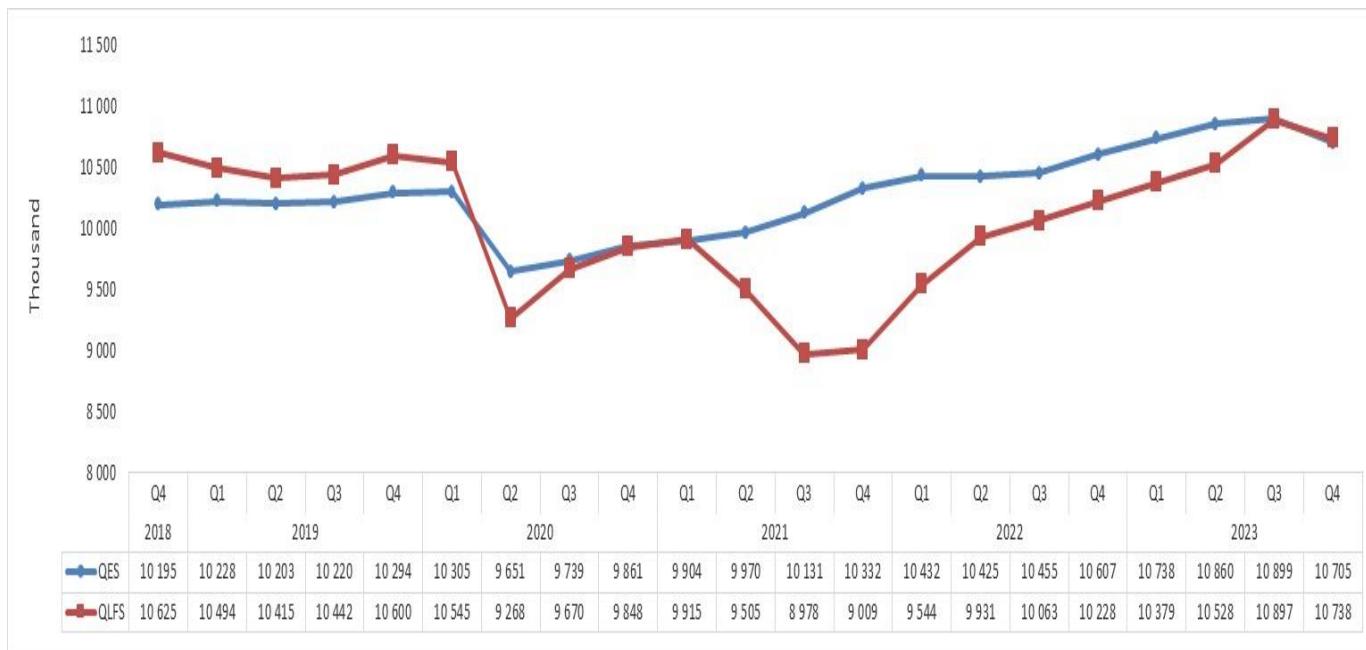

- Description of the employed, e.g. their demographic profile, education level, hours of work, etc.; and
- Unemployment and descriptors of the unemployed.

QLFS is a survey of households that collects information from approximately 30 000 dwelling units and collects data on the labour market activities of individuals, whereas QES is an enterprise-based survey that collects information from non-agricultural businesses and organisations from approximately 20 000 units. Numerous conceptual and methodological differences between the household- and enterprise-based surveys result in important distinctions in employment estimates derived from surveys. Among these are:

- Household-based survey includes agricultural workers, self-employed workers whose businesses are unincorporated, unpaid family workers, and private household workers among the employed; these groups are excluded from the enterprise-based QES survey.
- Household-based survey is limited to workers 15 years of age and older, whereas the enterprise-based survey is not limited by age.
- Household-based survey has no duplication of individuals because individuals are counted only once, even if they hold more than one job. In the enterprise-based survey, employees working at more than one job and thus appearing on more than one payroll are counted separately for each appearance.
- QLFS includes income tax, VAT and number of employees in determining the formal sector, while QES surveys enterprises with only VAT with annual turnover greater than R300 000.
- QLFS allows for proxy responses (a household member responding on behalf of the other). This can introduce misclassification of items, e.g. formal/informal classification.

Table F: Key differences between the QLFS and the QES

		QLFS	QES
Coverage		Private households and workers' hostels Non-institutional population (15 years and older) Total employment (including Informal sector, Private households, Agriculture and small businesses)	Payroll of VAT-registered businesses Employees only Formal sector, excluding Agriculture
Sample size		Quarterly sample of approximately 30 000 dwellings in which households reside	Quarterly sample of 20 000 non-agricultural formal- sector businesses
Reference period		One week prior to the interview	Payroll on the last day of the quarter
Standard Industrial Classification (SIC)		All industries	Excluding Agriculture and Private households
Formal sector definition (excluding Agriculture and Private households)		Employers and own-account workers registered for VAT or income tax Employees paying income tax and those not paying tax but working in firms with five or more workers	Employees on a payroll of VAT-registered businesses

Figure 15: Formal sector (non-agricultural) employment trends in QLFS and QES, Q4: 2018 to Q4: 2023 (employees only)

8. Technical notes

8.1 Response details

Table G: Response rates by province and metropolitan area

Province / Metropolitan Area	Oct-Dec 2023	Jan-Mar 2024
National	88,8	88,7
Western Cape	85,0	85,6
Non Metro	89,0	90,2
City of Cape Town	83,1	83,4
Eastern Cape	95,7	96,5
Non Metro	96,4	97,3
Buffalo City	93,7	94,2
Nelson Mandela Bay	94,8	95,4
Northern Cape	86,9	86,0
Free State	94,0	93,5
Non Metro	96,1	94,9
Mangaung	88,8	90,0
KwaZulu-Natal	90,9	92,4
Non Metro	93,5	94,4
eThekweni	86,9	89,4
North West	92,1	89,9
Gauteng	79,3	78,5
Non Metro	85,5	85,2
Ekurhuleni	79,4	79,7
City of Johannesburg	74,0	71,7
City of Tshwane	84,6	84,8
Mpumalanga	94,8	94,4
Limpopo	97,8	97,4

8.2 Survey requirements and design

QLFS uses the Master Sample frame that has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with the QLFS. The 2013 Master Sample is based on information collected during the 2011 Census conducted by Stats SA. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). Census EAs, together with auxiliary information for the EAs, were used as frame units or building blocks for formation of primary sampling units (PSUs) for the Master Sample. They covered the entire country and had other information that is crucial for stratification and creation of PSUs. There are 3 324 primary sampling units (PSUs) in the Master Sample, with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current Master Sample (3 324) reflects an 8,0% increase in the size of the Master Sample compared to the previous Master Sample in 2008 (which had 3 080 PSUs). The larger Master Sample of PSUs was selected to improve precision (smaller coefficients of variation, known as CVs) of the QLFS estimates.

The Master Sample is designed to be representative at provincial level and at metro/non-metro levels. Within metros, the sample is further distributed by geographical type. The three geography types used are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area the sample is representative of different geography types that may exist within that metro.

It is divided equally into four subgroups or panels called rotation groups. Rotation groups are designed in such a way that each of these groups has the same distribution pattern as that which is observed in the whole sample. They are numbered from one (1) to four (4), and these numbers also correspond to the quarters of the year in which the sample will be rotated for the particular group.

A sample for the QLFS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

8.3 Sample rotation

For each quarter of the QLFS, a quarter of the sampled dwellings are rotated out of the sample. These dwellings are replaced by new dwellings from the same PSU or the next PSU on the list. Thus, sampled dwellings are expected to remain in the sample for four consecutive quarters. It should be noted that the sampling unit is the dwelling, and the unit of observation is the household. Therefore, if a household moves out of a dwelling after being in the sample for two quarters (for example) and a new household moves in, the new household will be enumerated for the next two quarters. If no household moves into the sampled dwelling, the dwelling will be classified as vacant (or unoccupied).

8.4 Weighting

Sample weights were constructed in order to account for: the original selection probabilities (design weights); adjustments for PSUs that were sub-sampled or segmented; excluded population from the sampling frame (EAs with insufficient DUs); non-response; weight trimming; benchmarking to known population estimates from the Demographic Analysis Chief Directorate within Stats SA.

8.4.1 Non-response adjustment

In general, imputation is used for item non-response (i.e. blanks within the questionnaire) and edit failures (i.e. invalid or inconsistent responses). Eligible households in sampled dwellings can be divided into two response categories: respondents and non-respondents. Weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.). Adjustment for total non-response was computed at two levels of non-response: PSU non-response and household non-response.

8.4.2 Calibrated survey weights

Calibrated sample weights are constructed such that all individuals within a household are assigned the same adjusted base weight. Adjusted base weights are calibrated such that the aggregate totals will match with independently derived population estimates (from the Stats SA Demographic Analysis Chief Directorate) for various age, race and gender groups at national level and individual metropolitan and non-metropolitan area levels within provinces. Calibrated weights are constructed using the constraint that each person within the same household, should have the same calibrated weight, with a lower bound on the calibrated weights set at 50.

8.5 Estimation

Final survey weights are used to obtain the estimates for various domains of interest, e.g. number of persons employed in Agriculture in Western Cape, the number of females employed in Manufacturing, etc.

8.6 Reliability of the survey estimates

Since estimates are based on sample data, they differ from figures that would have been obtained from complete enumeration of the population using the same instrument. Results are subject to both sampling and non-sampling errors. Non-sampling errors include biases from inaccurate reporting, processing, and tabulation, etc., as well as errors from non-responses and incomplete reporting. These types of errors cannot be measured readily. However, to some extent, non-sampling errors can be minimised through the procedures used for data collection, editing, quality control, and non-response adjustment. The variances of the survey estimates are used to measure sampling errors.

(i) Variance estimation

Most commonly used methods for estimating variances of survey estimates from complex surveys such as the QLFS are the Taylor-series Linearization, Jack-knife Replication, Balanced Repeated Replication (BRR), and Bootstrap methods (Wolter, 2007).¹ The Fay's BRR method has been used for variance estimation in the QLFS because of its simplicity.

(ii) Coefficient of variation

It is more useful in many situations to assess the size of standard error relative to magnitude of the characteristic being measured (the standard error is defined as the square root of the variance). The **coefficient of variation (cv)** provides such a measure. It is the **ratio of the standard error of the survey estimate to the value of the estimate itself expressed as a percentage**. It is very useful in comparing the precision of several different survey estimates, where their sizes or scales differ from one another.

(iii) P-value of an estimate of change

The p-value corresponding to an estimate of change is the probability of observing a value larger than the particular observed value under the hypothesis that there is no real change. If the p-value <0,01, the difference is highly significant; if p-value is between 0,01 and 0,05, the difference is significant; and if p-value >0,05, the difference is not significant.

9. Definitions

Discouraged work-seeker is a person who was not employed during the reference period, wanted to work, was available to work/start a business but did not take active steps to find work during the last four weeks, provided that the main reason given for not seeking work was any of the following: no jobs available in the area; unable to find work requiring his/her skills; lost hope of finding any kind of work.

Economic activities are those activities that contribute to the production of goods and services in the country. There are two types of economic activities, namely: (1) Market production activities (work done for others and usually associated with pay or profit); and (2) Non-market production activities (work done for the benefit of the household, e.g. subsistence farming).

Employed persons are those aged 15–64 years who, during the reference week, did any work for at least one hour, or had a job or business but were not at work (i.e. were temporarily absent).

Employment-to-population ratio (labour absorption rate) is the proportion of the working-age population that is employed.

¹Wolter, K.M. 2007. *Introduction to Variance Estimation, 2nd Edition*. New York: Springer-Verlag.

Informal employment identifies persons who are in precarious employment situations, irrespective of whether or not the entity for which they work is in the formal or informal sector. Persons in informal employment, therefore, comprise all persons in the informal sector, employees in the formal sector, and persons working in private households who are not entitled to or receive basic benefits such as pension or medical aid contributions from their employer, and who do not have a written contract of employment.

Informal sector: The informal sector has the following two components:

- i) Employees working in establishments that employ fewer than five employees, who do not deduct income tax from their salaries/wages; and
- ii) Employers, own-account workers and persons helping unpaid in their household business who are not registered for either income tax or value-added tax.

The **labour force** comprises all persons who are employed, plus all persons who are unemployed.

Labour force participation rate is the proportion of the working-age population that is either employed or unemployed.

Long-term unemployment: Persons in long-term unemployment are those individuals among the unemployed who were without work and trying to find a job or start a business for one year or more.

Not economically active: Persons aged 15–64 years who are neither employed nor unemployed in the reference week.

Persons in **underemployment (time-related)** are employed persons who were willing and available to work additional hours, whose total number of hours actually worked during the reference period were below 35 hours per week.

Under-utilised labour comprises three groups that are defined as follows: persons who are underemployed, persons who are unemployed, and persons who are discouraged.

Unemployed persons according to the **Official definition** are those (aged 15–64 years) who:

- a) Were not employed in the reference week; **and**
- b) Actively looked for work or tried to start a business in the four weeks preceding the survey interview; **and**
- c) Were available for work, i.e. would have been able to start work or a business in the reference week; **or**
- d) Had not actively looked for work in the past four weeks but had a job or business to start at a definite date in the future and were available.

Unemployed persons according to the **Expanded definition** are those (aged 15–64 years) who:

- a) Fall under official unemployment (searched and available); **and**
- b) Were available to work but are/or:
 - Discouraged work-seekers
 - Have other reasons for not searching

Unemployment rate is the proportion of the labour force that is unemployed.

The **working-age population** comprises all persons aged 15–64 years.
