

## Export/Import Price Indexes and Trade Indexes– October. 2024(preliminary)

- The Export Price Index (KRW basis) increased 1.7 percent from the previous month.
  - The index increased 2.0 percent over the last 12 months.
- The Import Price Index (KRW basis) increased 2.2 percent from the previous month.
  - It decreased 2.5 percent over the last 12 months.
- The Export Volume Index increased by 5.7% and The Import Volume Index increased by 5.9% year-on-year in October of 2024.
  - The Export Value Index increased by 6.1% and The Import Value Index increased by 2.3% year-on-year in October of 2024.
- The Net Barter Terms of Trade Index increased by 3.9% year-on-year in October of 2024.

### Rates of Change in Export and Import Price Indexes<sup>1)2)</sup>

(KRW basis, %)

		Weight	Monthly change				Yearly change			
			2024				2024			
			Jul	Aug	Sep	Oct <sup>p</sup>	Jul	Aug	Sep	Oct <sup>p</sup>
Exports	All items <sup>1)</sup>	1000.0	0.8 <0.5>	-2.8 <-1.1>	-2.5 <-1.3>	1.7 <0.1>	13.0 <5.8>	5.5 <2.7>	1.0 <0.3>	2.0 <1.1>
	Agricultural, forestry & marine products	3.6	0.2	-0.7	0.2	1.2	-3.2	-2.7	-0.7	1.0
	Manufacturing products	996.4	0.8	-2.8	-2.6	1.7	13.0	5.5	1.0	2.0
Imports	All items <sup>1)</sup>	1000.0	0.4 <0.2>	-3.5 <-2.0>	-2.6 <-1.4>	2.2 <0.7>	9.9 <3.3>	1.8 <-0.7>	-3.7 <-4.4>	-2.5 <-3.3>
	Raw materials	315.0	0.6	-6.9	-4.0	4.1	10.6	-3.5	-12.5	-9.1
	Intermediate goods	459.2	0.3	-2.4	-2.3	1.6	11.4	4.9	0.5	0.8

(USD basis, year-on-year, %)

	Net barter terms of trade <sup>2)3)</sup>				Income terms of trade <sup>4)</sup>			
	2024				2024			
	Jul	Aug	Sep	Oct <sup>p</sup>	Jul	Aug	Sep	Oct <sup>p</sup>
All items	2.4 (1.0)	0.4 (-1.3)	1.4 (0.6)	3.9 (0.7)	11.7	5.5	5.5	9.8

Notes : 1) The current month index is preliminary and subject to revision next month.

2) Measures the quantity of imports that can be purchased through the sale of a single unit of exports, relative to the base year 2020

3) Figures in ( ) represent month-on-month.

4) Measures the quantity of imports that can be purchased through the sale of gross exports, relative to the base year 2020

(net barter terms of trade index × export volume index / 100; 2020=100).

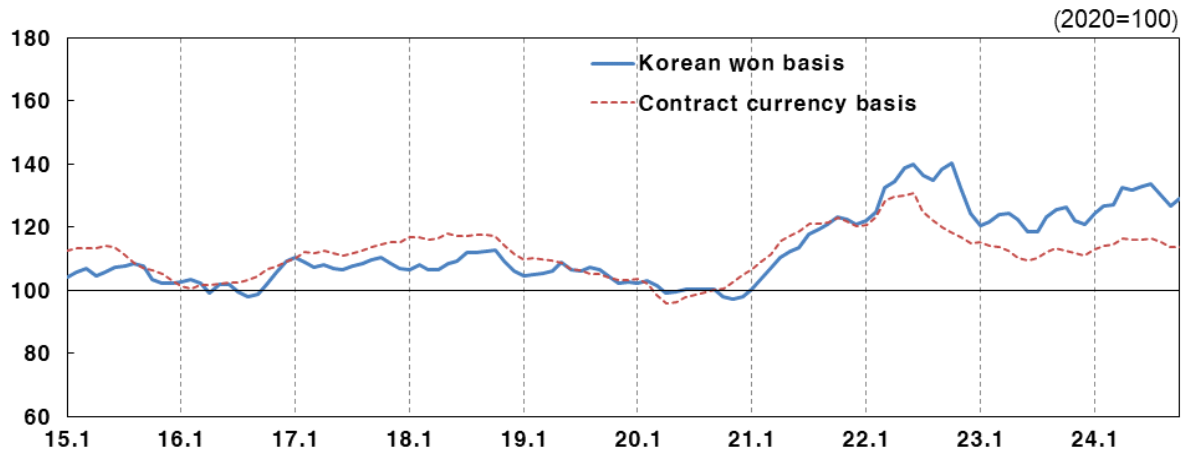

※ Further statistics can be found at the Bank of Korea's Economic Statistics System website (<http://ecos.bok.or.kr>).

**3. Rates of Change in Trade Indexes**

**4. Rates of Change in Terms of Trade Indexes**

## ( Appendix 1 )

### How the Export and Import Price Indexes are compiled

#### 1. Definition and use

- The Export and Import Price Indexes measure fluctuations in the prices of goods exported and imported. The indexes are used to gauge the effects of price fluctuations of these export/import items on domestic prices and the changes in their costs.

#### 2. Frequency

- At the beginning of each month, prices for the previous month are surveyed.

#### 3. Prices surveyed

- Average monthly prices are surveyed in principle, based upon the points at which the export/import contracts are entered into, so that they may serve as leading indicators of domestic prices.
- Export prices are surveyed on an FOB basis, and import prices on CIF. For some items, however, trade practices are applied.

#### 4. Items subject to survey

- Only items whose export/import amounts account for more than 1/2,000 of the country's trading volume; that are representative of the price movements of items grouped within similar industries; whose quality standards are uniformly maintained; and whose time series on prices are tenable, are surveyed. As of 2024, 210 items for exports and 237 for imports have met these requirements.
- Items marked without comparable price quotations for considerable period (e.g. vessel, weapons, aircraft, works of art) are excluded.

## 5. Method of compilation

### – Classification

- **Basic classification** : The industrial classification set out in the Korea Standard Industrial Classification (KSIC) is applied with necessary modifications as the basic classification. This is further broken down into two sub-categories for exports - agricultural, forestry & marine products and manufacturing products and three for imports - agricultural, forestry & marine products, mining products and manufacturing products.
- **Specialized classification** : For user convenience, the indexes are also classified into foods/non-foods; energy/items other than energy; information technology/items other than IT; and foods & energy/items other than foods & energy; as well as groupings by use (for MPI only), trade and industry type.

**Number of items and weights of each XMPI category(as of 2024)**

		Category	No. of items	Weight
Exports	All items		210	1000.0
	Basic	Agricultural, forestry & marine products	3	3.6
		Manufacturing products	207	996.4
Imports	All items		237	1000.0
	Basic	Agricultural, forestry & marine products	18	42.3
		Mining products	12	286.7
		Manufacturing products	207	671.0
	By use	Raw materials	30*	315.0
		Intermediate goods	149*	459.2
		Capital goods	36*	120.9
Consumer goods		44*	104.9	

\* As weights are allocated in proportion to the input ratios of the items by use, the total number of items under the 'by use' category is not identical to the number of items for the total index, *i.e.* 237.

### – Weights

- The weights of individual items are expressed in permillage in accordance with their shares in the total transaction amount.

### – Compilation

- The headline indexes are compiled from Korean won-based indexes, which are produced by converting the contract prices of exports/imports so that their impacts on domestic prices may be easily followed. Indexes based on contract currencies and on US dollars are compiled as supplementary indexes.

- The formula used to aggregate the indexes is a Lowe Chain weighted formula. The price reference and weighting period are changed every years, so as to increase the extent to which the Export and Import Price Indexes reflect realities through improvements in the selection of items to be surveyed and their weights, in line with changes in the trade structure.

## **6. Notes on statistical use**

- The purpose of the index is to measure the changes in the price, not to present absolute price levels.
- The Export and Import Price Indexes are compiled on three different bases: the Korean won, the contract currencies, and the US dollar. Users are hence advised to check the base currency first before using the indexes for statistical purposes.
- The current month index is preliminary and subject to revision next month.
